

The figure displays a 2D plot with a horizontal axis labeled from 0 to 200 in increments of 25. A rectangular region is centered around x=90, extending from approximately x=80 to x=105 and y=40 to y=55. This region is filled with a color gradient, transitioning from green on the left to yellow on the right. A red cross marker is positioned at approximately (95, 48), and a small blue dot is located at approximately (98, 52).
